

Introducing the F3061 & F4061 PORTABLES

Analog, LTR & Digital all in One

Migrate to a new digital platform. Spectrum is limited and this new 6.25kHz digital radio will give you the potential to meet expanding needs.

3-in-1 CAPABILITY – The F3061 comes standard with basic LTR, analog conventional, and digital conventional. 6.25kHz digital mode ready. A first in the LMR industry. You can start with 6.25kHz digital narrow mode communication that meets the FCC 6.25kHz emission mask requirements for narrow banding and increases efficiency of channel allocation and use of spectrum now, or add it later!

POPULAR SIGNALING – Built-in 2/5- tone, CTCSS, DTCS all come standard with the radio. Decode ten 2-tone or eight 5-tone codes on a channel.

WIDE SPECTRUM – Provides operation for full VHF high band range (136-174 MHz) and UHF (400-470 MHz range).

Other Features

- * 512 Channels
- * Switchable wide/narrow 12.5/25kHz
- * Full dot matrix display
- * Bottom row of display shows assigned functions for [PO] to [P3] buttons
- * Enhanced Audio with DTL amplifier
- * Mil Spec C, D, & E
- * Programmable w/CS-F3060 software & OPC-966 cable
