

## The most flexible and affordable “repeater” ever!

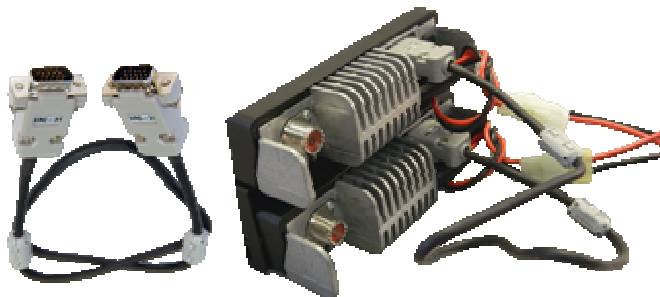

Here's the situation. You are an EMS, Fire, or Law Enforcement public safety first responder, maybe a utility worker, or other 2-way radio user that needs the power and performance of a mobile from your portable. Here's your solution.

First, get yourself a good portable like our TP8000 series. It will only cost you \$258 in your choice of VHF or UHF. We'll give you a \$45 trade in allowance for any old radio you may have. That drops your net cost to just \$214. You can read more about the TP8000 at [www.falcondirect.com/tecnet](http://www.falcondirect.com/tecnet).

Next, you buy a couple of our TecNet mobiles. The two of them won't cost you any more than the price of a single competitive radio (Just \$730 less a \$90 trade in allowance for a net price of just \$640. Your choice of a pair of VHF radios, UHF radios, or one each VHF & UHF.

Now you get a cable like the one shown at the left and plug it into the back of each radio. You now have a mobile repeater! Don't worry about the cost. We will provide the cable free with the purchase of two radios.

Now you've got yourself a complete mobile repeater system for just \$854 including the toughest portable radio on this planet. Throw in the cost of mobile antennas if you need them, installation, unless you want to do it yourself, and you are in business! If the portable is within range of the mobile (which can be up to several MILES away), you can talk on your portable with the power of a mobile!

Want to know more? Just give us a call at 800.489.2611 or drop us an email to [ServingU@falcondirect.com](mailto:ServingU@falcondirect.com). We'll be looking forward to hearing from you!
